

sp

An architectural elevation drawing of a building facade. The drawing is composed of several geometric forms. On the left, there is a tall, narrow vertical rectangular element. To its right is a lower section featuring a window with a grid pattern. The main part of the facade is a large, wide rectangular area with a slightly pitched roofline. On the right side of this main section, there is a smaller, rectangular protrusion with a sloped top edge. The entire drawing is rendered in black outlines on a white background.

This is a detailed architectural elevation drawing of a building facade. The structure is long and low, with a flat roof. The facade is composed of several distinct sections. On the far left, there is a small, square, multi-paned window. To its right is a larger, rectangular section with a grid of windows. The central part of the facade is dominated by a long, horizontal band of windows, each divided into multiple panes. To the right of this central band is another rectangular section with a grid of windows, similar to the one on the left. On the far right, there is a small, square, multi-paned window. The drawing uses fine lines to represent architectural details, such as window frames, mullions, and the building's base. The overall style is minimalist and technical, typical of architectural drawings.
